

Pre-Op Phase of Care (Jan/Feb)

Surgeon Office

PAT Program

Surgical Clearance

Day of Surgery

Case Request

- Communicates all procedure related information to the OR
 - Paper form generated from Epic and faxed to surgical center (USPI/GSMC)
 - Surgeon practice to obtain authorization prior to scheduling surgery and indicate on booking form

Pre-Surgical Testing and Medical Assessment

- Surgeon, PA, or MA selects required lab tests on form
- Paper checklist given to patient to have completed by PCP and consulting providers (if applicable)
- Standard H&P paper form provided to patient to have PCP complete

Education

- GSMC provides pre-op PT evaluations
- Pre-recorded TJR class from HSS sent to patient
- GSMC case management meets with patient during PAT to discuss d/c planning needs

GSMC PAT Program

- Patient completes ~2 weeks prior to surgery:
 - Labs
 - Imaging
 - Medications
 - MRSA screening
 - CHG Bathing
 - Infection prevention
 - NPO status

Patient

- Faxes completed notes to practice and practice uploads into Epic

Surgeon / Private PA

- Reviews documentation for any red flags and ensures no further testing is required
- HSS submits to surgical site (USPI/GSMC)

48-72 hours prior to surgery

Anesthesiologist reviews following information to ensure patient is ready optimized for surgery:

- H&P / Medical Assessment
- Consult Notes
- Lab Results

24 hours prior to surgery

Pre-op Nursing Call Center contacts the patient to discuss and reinforce key points:

- OR Schedule / Time
- Review medications
- Diet reminder
- Clothing
- Final instructions

HSS Internist / Hospitalist on-call to GSMC for any escalation needs

Surgeon / Private PA

- Complete chart review
- Reads pre-op note for the plan for care
- Med corrections
- Post-op orderset
